This game is ♥♥♥♥ing amazing. Mantep cuk premium akun ne karo lisensi sesasi. Just downloaded, and my inital feelings are this is incredible! I havent figured out everything yet, but the one thing I would really like to see is the ability to "flick" the puck witht the goalie stick. After I make a save I would like to be able to clear my crease and idealy shoot the puck back towards the fowards blasting slapshots at my head.

It is a ton of fun to play!! I would love to see more shots to the top glove, or maybe a slider to scale where shots are taken

Edit: And I do jump half the time at shots coming at me. Beautiful monochromic expirience, perfect match with audio. Game flow reminds of Journey, hard to stop playing. Hardly recommend.. Some parts of this game were really good, graphics were outstanding but the cons far outweigh the pros.

Long useless leadins, even after employing the skip feature. The endless interrogations with flashing lights and garbled screen. After putting up with that every time I wanted to resume a game, my eyes felt ready to pop out of my head. The incredible stupidity of the bots in single player campaigns. The game making you fail over and over again to complete and escape before finally letting you succeed.

A waste of time and money.. "Load your Guns and Rock'n'Roll, Babe!!"

...at least that's what i thought but the truth is painfully different. Its more like:

"Load your backpack with Grenades and throw them like stupid"

In every match i encountered, the players only throw Grenades, never using a skill and only shooting for getting a kill.

To quote a player i chatted with:"This game should be named Grenadiers."

I TRIED to write a fair and neutral Review but its impossible! The most important aspect for a game isn't given here...you wanna know what this aspect is? Being able to play and have fun! Sorry guys...but as long as Grenades are that overused, i'm not giving this Game a thumbs up.. Best game ever, would 100% reccomend ! :). The game builds suspense via resource management very well. It leaves you very limited information about the "phenomenons" you encounter, which feeds into the suspense. A nice little game

---

Highschool possession is a visual novel, I really really recommend this one, a wonderful, beautiful visual novel.

- +amazing soundtrack
- +great backgrounds
- +everything is so awesome about this game
- +and a beautiful main menu

10V10. The best game on steam.. SOOO awesome. Wish more people played!! Very beautiful Upgrade to The Golf Club!

Some tiny wishes left:

- \* free adjustable and saveable campositions (F9 saveable)
- \* realtime switchable greengrid
- \* maybe an ambient soundmixer

This upgrade is every cent worth!

Thanks for it..... This game gives you extreme rage... But if you like little puzzles and stuff, get it... It's like something you would see in the background of a YouTube video.... The weapons, outfit and pet/mount skin are cool. A little cheap to just give us 30 days of premium and 1200 Lumen but it will do.

Even though it was only 30 days of premium I still recommend it for the badass look.. I originally gave this game a thumbs down because of bugs but, within a week, all the bugs i myself had spotted have been patched. Very impressed. The voice acting still sucks and i would like more variety in the character creation and progression. The one bug that hasn't been fixed yet is the fact that stores replenish identical stock if you leave and reopen them. Fix that please. Randomise shop inventory and give it a cooldown for it to replenish. Combat is still good as it always was and the introduction of hotkeyed abilites was a big yes for me!
